LIST OF SEED CONTRIBUTORS

This catalog contains ten lists of which this is the first and most important. Without this loyal corps of contributors who willingly share their keen interest and expertise in the genus Rhododendron with the American Rhododendron Soceity, there would be no seed exchange. They spend a great deal of time making crosses, collecting and cleaning seed.

Richard Murcott,New York Chapter,again contributed his computer and his expertise in using it to automate some of the operations of the seed exchange making this earlier distribution of the catalog possible.

Gay and Frank Arsen were proof readers.
