

This catalog contains eleven lists of which this is the first and most important. Without this loyal corps of contributors who willingly share their keen interest and expertise in the Genus *Rhododendron* with the American Rhododendron Society there would be no seed exchange. They spend a great deal of time making crosses, collecting and cleaning seed. Bob Murray, Princeton Chapter, who keeps the Exchange mailing list up to date reprogrammed the computer operation making it possible to do all the work in Guilford. Richard Murcott, New York Chapter, who for the past nine years did all the computer programming helped in the transition. Our thanks to all of them.
