

## CONTRIBUTORS

The most important list in this catalogue. The amount of time and human energy that is invested from the point of conceiving a cross, contributing and receiving seed in the mail from the Seed Exchange, growing on the seed, to actually having a plant in the ground, to seeing it flower, is nothing short of amazing. Some 'thank you' postcards went out early but as the seed started rolling in, a lot of you have not received the thanks you deserve. Please accept a deep offering of gratitude from the entire Rhododendron world for your efforts and dedication to the genus and its fans.
